ABSTRACTED-PUB-NO: JP 55040835A

BASIC-ABSTRACT:

One or both sides of base paper is coated or the base paper is impregnated with an aq. emulsion resin which contains ethylene polymer consisting of 96-85, pref. 94-90 mol.% of ethylene and 4-15, pref. 6-10 mol.% of alpha,beta-ethylenic unsatd. carboxylic acid of which 50% of the carboxylic acid gps. may be alkyl ester.

At least 10% of the unsatd. carboxylic acids is neutralised with metallic ion and/or ammonium ion. The neutralised copolymer has a melting heat of 2.0-10.0, pref. 3.0-7.0 cal./g. The resin is applied uniformly in 3-20, pref. 4-15 g./m.²

The alpha,beta-ethylenic unsatd. carboxylic acids are e.g. (meth)acrylic, fumaric, itaconic and maleic acids. The alkyl esters are e.g. methyl

(ethyl,
butyl) (meth)acrylate, dimethyl fumarate and monoethyl malaeate. The
coated
paper has excellent heat sealing property and resistance to oil and
blocking.
